## Hot Topics

Diastasis recti  
Complex hernia  
Hernia prevention  
New technologies

**FAENZA - MARCH 6-7 2025**

FAVENTIA SALES, Via San Giovanni Bosco 1

# CONFERENCE INTRODUCTION

This two-days conference will delve into the most recent advancements in abdominal wall surgery, with a particular emphasis on high-precision technologies, preventive strategies, minimally invasive surgical (MIS) techniques, and emerging trends in the comprehensive management of hernias and diastasis recti.

- **Day 1:** Focused on the proposal of a Delphi consensus process to define "complex" inguinal hernia scenario and nuances of managing these cases through minimally invasive surgery.
- **Day 2:** Dedicated to Innovations and Future Trends in AWS, alongside detailed discussions on diastasis recti and strategies for hernia prevention. Topics will include cutting-edge technologies such as robotic-assisted surgery, advancements in tele-tutoring for surgical education, and innovative approaches to repair and reconstruction of abdominal wall defects, all designed to improve clinical outcomes and refine surgical methodologies.

With presentations by leading experts, interactive panel discussions, and high-quality re-live surgical video demonstrations, the conference will offer participants advanced, evidence-driven insights and practical tools for addressing complex surgical scenarios in hernia repair and abdominal wall reconstruction.
